

**Plastic Buckle Pocket**

Plastic Buckle Pockets are made of tough polycarbonate material. These pockets are attached to the sign via an elastic band which keeps constant tension on the sign in hot and cold weather. This pocket system deploys quickly and offers a very small rolled up diameter for easier storage.

**Delta Pocket**

At 3/4" deep, the Delta Pocket is designed to be easier to deploy than conventional pockets. Made of tough polycarbonate, it features three rivet points for increased strength and is used on the horizontal corners only. Compact size and molded channel for the velcro strap allow for the smallest storage diameter in the industry for signs with plastic pockets.

**Rectangular Pocket**

Featuring a full depth design, rectangular pockets are typically used at the top and bottom of the sign. Made of tough polycarbonate, they will fit all pocket style sign holders. Two rivets are housed within the body of the pocket making them more durable than most other designs. These pockets may be installed on the horizontal corners if requested.

**Cloth Pocket**

The cloth pocket is sewn to the sign face and is made from nylon reinforced vinyl. Cloth pockets are easy to use and allow for the smallest rolled up storage diameter.

**MultiClamp**

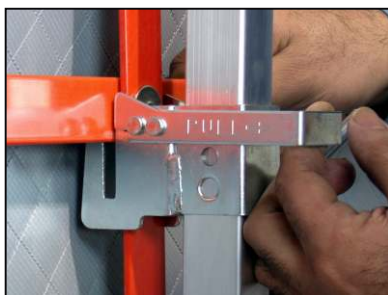

**UniClamp**

## Mast Clamps

These adjustable zinc plated steel clamps allow roll up signs to be attached to masts or post of various diameters and shapes. The clamps may be permanently attached to the roll-up sign at the center and lay flat to allow the sign to be rolled up for storage. Available factory installed or as a retro-fit.

**MultiClamp** features three openings to fit 1" square, 1" round, and 3/4" square masts.

**UniClamp** is a universal design that allows the sign to be affixed to various size masts.

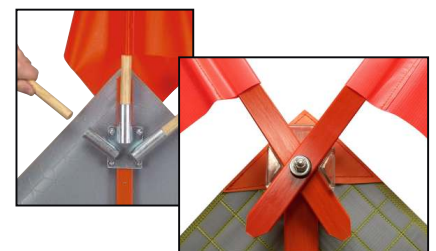

**Roll-Up Bracket (RUB3315)**

This bracket allows roll-up signs to be mounted to the vertical mast on full size sign stands. The horizontal rib on the sign locks securely into the bracket. Stands with part numbers ending in RUB or RG/RU come with the RUB3315 installed, it may also be ordered as a separate item.

**Overlays**

Most signs may have velcro added to specific words that allows for multiple messages to be displayed using a single roll-up sign. Overlays are made from the same material as the sign and come with velcro strips on the back. Snap attachment is also available on request.

## Flagholder Options

A wide variety of folding flag systems and flagholders are available. Please see page 22 for information.
