

# B4DH-SL

## FACT SHEET

### Solar/DCell High Intensity B Light

On/Off and Mode Switches

Battery Case w/Battery Direction Indicators

Hardware (Per Case of 10 Lights)

Battery Case Snaps In and Out

The B4DH-SL is a dual Solar/D-cell barricade light which is powered by an extremely efficient solar panel, D-cell batteries, or a combination of both. Combining power supplies provides longer operational life and greatly reduces the frequency of battery changes thus increasing worker safety and reducing battery disposal. During daylight hours the solar panel charges the batteries, even in overcast conditions.

- Exceeds ITE standards and MUTCD visibility specifications.
- Independently tested by a Coast Guard approved laboratory.
- Maintenance free operational life is about 5 years in optimal conditions with the combination of quality D-Cell batteries, solar cells, and our "Smart Circuit" technology.
- Select from 3 modes: Flashing/Dim, Flashing/No Dim, or Off.
- Dim mode dims light to 50% at night to extend battery life.
- Charge time: 2 days.
- Run time for solar cells (dim mode): 5 days.
- Run time for solar cells (non-dim mode): 3 days
- Unidirectional lens with attached visor to eliminate sun glare.
- Features optically correct UV stabilized polycarbonate lens, high impact visor and case, and stainless steel contacts.
- May be self-certified for compliance with NCHRP-350 crash test standards.
- Each light supplied with mounting hardware: bolts, switch pins, and wrench. Bolt protectors available at extra cost.
- Operates with solar cells independently or in combination with "D" cell batteries (not included). *It is recommended that 4 "D" cell batteries be installed for optimal performance.*
- Standard package: 10 lights/carton.
